## Volume 88 (1996)

**Acetylcholine**; Aging; Acetylcholine uptake site; $GABA_A$; Receptor autoradiography; Rat **88**, 49
**Acetylcholine uptake site**; Aging; Acetylcholine; $GABA_A$; Receptor autoradiography; Rat **88**, 49
**Adoptive transference**; Aging; *Trypanosoma cruzi* antigen; Antigen-presenting cells **88**, 39
**Ageing**; Calcium homeostasis; Rat; Brain; Kinetic analysis **88**, 17
**Aging**; Acetylcholine; Acetylcholine uptake site; $GABA_A$; Receptor autoradiography; Rat **88**, 49
**Aging**; Cell activation; Herbimycin A; Human T lymphocytes; Pervanadate; Protein tyrosine kinase **88**, 125
**Aging**; Human T lymphocytes; Cell activation; Apoptosis **88**, 25
**Aging**; Insulin; Life span; Caloric restriction; Growth factors **88**, 75
**Aging**; Invertors; Insulin; Myocardium; Membranes **88**, 67
**Aging**; Muscle fibers; Myosin; Nuclei **88**, 185
**Aging**; Rat; Physical training; Collagen; Tendon; Connective tissue; Cross-linking; Biomechanics; Thermal stability **88**, 139
**Aging**; *Trypanosoma cruzi* antigen; Adoptive transference; Antigen-presenting cells **88**, 39
**Aging**; Werner syndrome heterozygotes; Micronucleus formation; Population doubling time **88**, 1
***Allium cepa***; Selective ribosomal cistron regulation; Nuclear macromolecules; Nucleolar morphology; Cellular senescence point-of-no-return; Gene silencing; Karyoskele ton; Nuclear matrix **88**, 83
**Antigen-presenting cells**; Aging; *Trypanosoma cruzi* antigen; Adoptive transference **88**, 39
**Apoptosis**; Human T lymphocytes; Aging; Cell activation **88**, 25

**Biomechanics**; Rat; Aging; Physical training; Collagen; Tendon; Connective tissue; Cross-linking; Thermal stability **88**, 139
**Brain**; Calcium homeostasis; Ageing; Rat; Kinetic analysis **88**, 17
**Breast cancer**; Mortality; Epidemiology; Gompertz; Weibull function **88**, 169

**Calcium homeostasis**; Ageing; Rat; Brain; Kinetic analysis **88**, 17
**C2 allele**; ETS-I oncogene; Elderly **88**, 61
**Caloric restriction**; Aging; Insulin; Life span; Growth factors **88**, 75
**Cell activation**; Aging; Herbimycin A; Human T lymphocytes; Pervanadate; Protein tyrosine kinase **88**, 125
**Cell activation**; Human T lymphocytes; Aging; Apoptosis **88**, 25
**Cellular aging**; Endothelial cell; Fibronectin; Promoter; Transcription factors; Electrophoretic mobility shift assay **88**, 111
**Cellular senescence point-of-no-return**; *Allium cepa*; Selective ribosomal cistron regulation; Nuclear macromolecules; Nucleolar morphology; Gene silencing; Karyoskele ton; Nuclear matrix **88**, 83
**Collagen**; Rat; Aging; Physical training; Tendon; Connective tissue; Cross-linking; Biomechanics; Thermal stability **88**, 139
**Connective tissue**; Rat; Aging; Physical training; Collagen; Tendon; Cross-linking; Biomechanics; Thermal stability **88**, 139

**Cross-linking**; Rat; Aging; Physical training; Collagen; Tendon; Connective tissue; Biomechanics; Thermal stability **88**, 139

**Down's syndrome**; Hydroxyl radical; Sulphite oxidation; Sulphur trioxide **88**, 95

**Elderly**; C2 allelle; ETS-I oncogene **88**, 61
**Electrophoretic mobility shift assay**; Cellular aging; Endothelial cell; Fibronectin; Promoter; Transcription factors **88**, 111
**Endothelial cell**; Cellular aging; Fibronectin; Promoter; Transcription factors; Electrophoretic mobility shift assay **88**, 111
**Epidemiology**; Breast cancer; Mortality; Gompertz; Weibull function **88**, 169
**ETS-I oncogene**; C2 allelle; Elderly **88**, 61

**Female mice**; Mobility restriction; Longevity **88**, 159
**Fibronectin**; Cellular aging; Endothelial cell; Promoter; Transcription factors; Electrophoretic mobility shift assay **88**, 111

**$GABA_A$**; Aging; Acetylcholine; Acetylcholine uptake site; Receptor autoradiography; Rat **88**, 49
**Gene silencing**; *Allium cepa*; Selective ribosomal cistron regulation; Nuclear macromolecules; Nucleolar morphology; Cellular senescence point-of-no-return; Karyoskele ton; Nuclear matrix **88**, 83
**GLUT4**; Senescence-accelerated mouse (SAM); SAMP8; SAMR1; GLUT1 **88**, 149
**GLUT1**; Senescence-accelerated mouse (SAM); SAMP8; SAMR1; GLUT4 **88**, 149
**Gompertz**; Breast cancer; Mortality; Epidemiology; Weibull function **88**, 169
**Growth factors**; Aging; Insulin; Life span; Caloric restriction **88**, 75

**Herbimycin A**; Aging; Cell activation; Human T lymphocytes; Pervanadate; Protein tyrosine kinase **88**, 125
**Human T lymphocytes**; Aging; Cell activation; Apoptosis **88**, 25
**Human T lymphocytes**; Aging; Cell activation; Herbimycin A; Pervanadate; Protein tyrosine kinase **88**, 125
**Hydroxyl radical**; Down's syndrome; Sulphite oxidation; Sulphur trioxide **88**, 95

**Insulin**; Aging; Life span; Caloric restriction; Growth factors **88**, 75
**Insulin**; Invertors; Myocardium; Membranes; Aging **88**, 67
**Invertors**; Insulin; Myocardium; Membranes; Aging **88**, 67

**Karyoskele ton**; *Allium cepa*; Selective ribosomal cistron regulation; Nuclear macromolecules; Nucleolar morphology; Cellular senescence point-of-no-return; Gene silencing; Nuclear matrix **88**, 83
**Kinetic analysis**; Calcium homeostasis; Ageing; Rat; Brain **88**, 17

**Life span**; Aging; Insulin; Caloric restriction; Growth factors **88**, 75
**Longevity**; Female mice; Mobility restriction **88**, 159

**Membranes**; Invertors; Insulin; Myocardium; Aging **88**, 67
**Micronucleus formation**; Werner syndrome heterozygotes; Aging; Population doubling time **88**, 1
**Mobility restriction**; Female mice; Longevity **88**, 159
**Mortality**; Breast cancer; Epidemiology; Gompertz; Weibull function **88**, 169
**Muscle fibers**; Aging; Myosin; Nuclei **88**, 185
**Myocardium**; Invertors; Insulin; Membranes; Aging **88**, 67
**Myosin**; Muscle fibers; Aging; Nuclei **88**, 185

**Nuclear macromolecules**; *Allium cepa*; Selective ribosomal cistron regulation; Nucleolar morphology; Cellular senescence point-of-no-return; Gene silencing; Karyoskele ton; Nuclear matrix **88**, 83
**Nuclear matrix**; *Allium cepa*; Selective ribosomal cistron regulation; Nuclear macromolecules; Nucleolar morphology; Cellular senescence point-of-no-return; Gene silencing; Karyoskele ton **88**, 83
**Nuclei**; Muscle fibers; Aging; Myosin **88**, 185
**Nucleolar morphology**; *Allium cepa*; Selective ribosomal cistron regulation; Nuclear macromolecules; Cellular senescence point-of-no-return; Gene silencing; Karyoskele ton; Nuclear matrix **88**, 83

**Pervanadate**; Aging; Cell activation; Herbimycin A; Human T lymphocytes; Protein tyrosine kinase **88**, 125
**Physical training**; Rat; Aging; Collagen; Tendon; Connective tissue; Cross-linking; Biomechanics; Thermal stability **88**, 139

**Population doubling time**; Werner syndrome heterozygotes; Aging; Micronucleus formation **88**, 1
**Promoter**; Cellular aging; Endothelial cell; Fibronectin; Transcription factors; Electrophoretic mobility shift assay **88**, 111
**Protein tyrosine kinase**; Aging; Cell activation; Herbimycin A; Human T lymphocytes; Pervanadate **88**, 125

**Rat**; Aging; Physical training; Collagen; Tendon; Connective tissue; Cross-linking; Biomechanics; Thermal stability **88**, 139
**Rat**; Calcium homeostasis; Ageing; Brain; Kinetic analysis **88**, 17
**Rat**; Aging; Acetylcholine; Acetylcholine uptake site; $GABA_A$; Receptor autoradiography **88**, 49
**Receptor autoradiography**; Aging; Acetylcholine; Acetylcholine uptake site; $GABA_A$; Rat **88**, 49

**SAMP8**; Senescence-accelerated mouse (SAM); SAMR1; GLUT4; GLUT1 **88**, 149
**SAMR1**; Senescence-accelerated mouse (SAM); SAMP8; GLUT4; GLUT1 **88**, 149
**Selective ribosomal cistron regulation**; *Allium cepa*; Nuclear macromolecules; Nucleolar morphology; Cellular senescence point-of-no-return; Gene silencing; Karyoskele ton; Nuclear matrix **88**, 83
**Senescence-accelerated mouse (SAM)**; SAMP8; SAMR1; GLUT4; GLUT1 **88**, 149
**Sulphite oxidation**; Down's syndrome; Hydroxyl radical; Sulphur trioxide **88**, 95
**Sulphur trioxide**; Down's syndrome; Hydroxyl radical; Sulphite oxidation **88**, 95

**Tendon**; Rat; Aging; Physical training; Collagen; Connective tissue; Cross-linking; Biomechanics; Thermal stability **88**, 139
**Thermal stability**; Rat; Aging; Physical training; Collagen; Tendon; Connective tissue; Cross-linking; Biomechanics **88**, 139
**Transcription factors**; Cellular aging; Endothelial cell; Fibronectin; Promoter; Electrophoretic mobility shift assay **88**, 111
***Trypanosoma cruzi* antigen**; Aging; Adoptive transference; Antigen-presenting cells **88**, 39

**Weibull function**; Breast cancer; Mortality; Epidemiology; Gompertz **88**, 169
**Werner syndrome heterozygotes**; Aging; Micronucleus formation; Population doubling time **88**, 1
